Website Project Proposal

Divine Delights Bakery

Prepared for: Divine Delights (Owner: Wanga Ndou)
Location: Pretoria West, South Africa
Prepared by: Thapelo Mokoditoa
Part 1: Building the Foundation, Project Initiation and Planning

Proposal: Divine Delights

1. Organisation Overview

Divine Delights is a home based bakery owned by Wanga Ndou, based in Pretoria West. It started in June 2026 and it makes custom and standard cakes, with the motto “Made with Love, Served with Honor.” Right now it does not have a website. Most orders come from word of mouth.

Mission: To bring joy to every occasion with cakes that are baked with care and priced honestly.

Vision: To become the name people in Pretoria West think of first for custom cakes.

Target audience: People living in and around Pretoria West who are planning birthdays and celebrations, especially those who want a cake made just for them instead of a plain, ready made one.

2. Website Goals and Objectives

The main goal is to give the business an online presence so people can find it easily, instead of relying only on word of mouth. The site should make it simple for customers to send in a custom cake request, and it should show clear prices, R300 for a basic cake and R500 for a custom cake, so there are fewer back and forth questions before an order is placed. Success will be measured by the number of orders and enquiries that come through the site each month, how many people visit the site, and how many people click through from social media.

3. Current Website Analysis

This does not apply here, since Divine Delights does not have a website yet. This proposal is for a brand new site.

4. Proposed Website Features and Functionality

The site will have a homepage that introduces the bakery and shows its most popular cakes, and an About Us page telling the story of the business and the owner. A Products page will lay out the full price list. Basic cakes are R300 (6 inch, 3 layers, simple icing and a few decorations, vanilla flavoured). Custom cakes start from R500 and include pictures, balls and other extra decorations. Premium cakes start from R650, are 6 inch with 4 layers, and are fully customisable, with a quote given based on what the customer asks for. Cupcakes are R14 each, or R180 for 12, R360 for 24, and R420 for 30. Bento cakes with a picture are R300 with 2 cupcakes, or R400 with 6 cupcakes. Flavours on offer are chocolate, vanilla, blueberry, caramel, red velvet and carrot, and fillings can be discussed depending on availability. The most important feature is a Custom Cake Order Form, where customers can describe what they want, upload a picture of the design they like, choose a flavour, and let us know about any allergies. Finally, a Contact page will give a WhatsApp number, phone number and location, along with a gallery of past cakes.

5. Design and User Experience

The colours will be soft pink and cream, to match the logo. Headings will use a nice script style font, while the rest of the text will use a simple, easy to read font. The layout will have a simple menu at the top, one column on mobile phones, and enough space so the page does not feel crowded. To keep it easy to use, there will be clear “Order Now” buttons, contact details that are easy to find, and pictures that load quickly.

6. Technical Requirements

The site will be built using HTML, CSS and a bit of JavaScript. It will be hosted with a South African provider such as xneelo or Afrihost, using a .co.za domain like divinedelightsbakery.co.za.

7. Timeline and Milestones

The project will run over two months. In Month 1, the focus is on planning, drawing up wireframes, and building the two simplest pages first, the homepage and the About Us page. In Month 2, the focus shifts to the more complex parts of the site, the Products page and the Custom Cake Order Form, followed by the Contact page. The last part of Month 2 is for testing the site to catch any errors, then launching it in time for the submission date.

8. Budget

Domain name: R108 a year. Hosting: about R108 to R1,000 a year, depending on the package chosen. Since I will be building and maintaining the site myself for this assignment, there are no extra development costs to budget for.
